Prolight S Series Pro

Interactive Flat Panel

ProLight Interactive Flat Panel offers an all-in-one solutions for meeting rooms and classrooms collaboration needs. Users can wirelessly present their computer content to ProLight's 4K (UHD) interactive flat panel without the need to install any software or application.

ProLight interactive flat panel offers a true multi touch capabilities - up to 20 simultaneous point of touch, touch gesture recognition - write with the pen and erase with your palm, fast touch response time, as well as easy to use and intuitive Android-based built-in software.
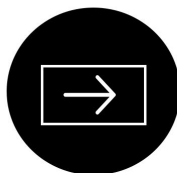

**Precise Writing**   **4K Image**   **Android 8.0**   **Display Loop Out**   **Dual Color Pen**   **Wireless Projection**   **Windows System**

Multiple function Integrated

ProLight Interactive Display integrates various function such as whiteboard, electronic whiteboard, computer, speaker, projector, wireless display, etc

Smart Writing

20 point infra red touch technology with thin pen tip, ultra fast writing respone speed, and 1 mm writing accuracy will restore the real writing experience. Single point writing and two-point for zooming, dragging and gesture erasing.

Better performance

Thanks to 4GB RAM and 32GB of ROM, it makes our ProLight's newer version has 200% better performance compare to previous version. It will be easier to do multiple various job and activity in ProLight.

Data-to-Go

Save annotation and share them as review material with multiple ways such as converted into QR Codes for instant sharing via mobile device or send to mail directly from the whiteboard.

Better field of view

With double side 13.8 mm narrow frame and superb anti-glare technology, our ProLight will delivered large field of view and can be clearly displayed event in bright light without missing any details.

Inteligent eye protection

We provided two ways to increase user's eye protection. The first way is by reducing the blue light and turning interface into yellow light mode. The second way is to darken the backlight.

Instant plug and play

The S Series can save you from hassles of complicated setup. Simply connect a PC via USB and you are all set to deliver the message.

Wireless content streaming

With built in content streaming software, users will no longer need to bother with messy cables. Users can stream content directly from their computer or mobile devices in real time onto Prolight's screen and increased productivity.

Switch input source by touch

Instead of using a remote control, users can easily switch between different input sources by touch. It's time saving and hassle free.

Temperature information

Monitor the machine's temperature in time and forced shut down when reaching dangerous degree to avoid damage.

Built-in wifi, Bluetooth, and hotspot

No need to use external wifi & bluetooth. Taking it out from the box and connect directly to existing access point to get internet connection.

Auto adjust brightness

Let the machine automatically adjust the brightness based on ambient brightness variation
